

Multiplication Bee

Mobile Experience — Coming to You

Your kid might be a math person.

They just haven't found out yet.

Here's what the event looks like.

Kids compete in age-based rounds, one at a time, answering multiplication facts out loud against the clock. The crowd goes quiet. The emcee builds the moment. Between rounds there's time to regroup — and practice.

The event closes with an all-ages round just for fun — kids and adults side by side. Whether a child watches an adult struggle and sees what's possible, or a kid beats a grown-up and walks away with something new to feel about themselves, that final round is the moment people talk about on the way home.

They leave with more than a gift bag.

Every participant goes home with the WhatTimesWhat URL — a free, browser-based multiplication practice tool available anytime, on any device, forever. No app, no subscription, no cost. The event plants the seed. The tool is how they come back and prove they've grown.

We come to you. You do nothing.

No venue to book. No driving across town. We set up in your home, backyard, school multipurpose room, or wherever your group gathers. We bring everything and handle setup and teardown.

Details

Great for	What's included
Birthday parties (any age) PTA and school family nights End-of-year celebrations Church and community events Homeschool co-ops	Up to 90 minutes of live competition Up to 10 contestants (more available) All equipment provided Live emcee included Gift bag for every participant

A nonprofit with a mission brings this to your door.

The Multiplication Bee is a community outreach program of the Classical Education Foundation, a Texas 501(c)(3) nonprofit. Hosting families make a suggested donation of \$299 — fully tax-deductible — to support free math fluency programs for students across North Texas.

Your event funds the work. Every student we reach because of it is the return on that investment.
